EXAMINER

CARLSON, JEFFREY D

ART UNIT

PAPER NUMBER

3622

DATE MAILED: 08/25/2005

Please find below and/or attached an Office communication concerning this application or proceeding.

## Office Action Summary

Application No.	Applicant(s)	
09/237,718	LANDSMAN ET AL	
Examiner	Art Unit	
Jeffrey D. Carlson	3622	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 02 June 2005.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

### Disposition of Claims

- 4) ☒ Claim(s) See Continuation Sheet is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) See Continuation Sheet is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

### Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

### Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some \* c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- \* See the attached detailed Office action for a list of the certified copies not received.

### Attachment(s)

- 1) ☐ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)  
Paper No(s)/Mail Date \_\_\_\_\_
- 4) ☐ Interview Summary (PTO-413)  
Paper No(s)/Mail Date. \_\_\_\_\_
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: \_\_\_\_\_

Continuation of Disposition of Claims: Claims pending in the application are 3-7,9,10,12-18,20-22,24,25,27-33,35,37-41,43,44,46-52,54-56,58,59,61-67,69,71-75,77,78,80-86,88-90,92,93,95-102 and 104-108.

Continuation of Disposition of Claims: Claims rejected are 3-7,9,10,12-18,20-22,24,25,27-33,35,37-41,43,44,46-52,54-56,58,59,61-67,69,71-75,77,78,80-86,88-90,92,93,95-102 and 104-108.

### **DETAILED ACTION**

This action is responsive to the paper(s) filed 6/2/05.

#### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 3-7, 9, 10, 12-18, 20-22, 24, 25, 27-33, 35, 37-41, 43, 44, 46-52, 54-56, 58, 59, 61-67, 69, 71-75, 77, 78, 80-86, 88-90, 92, 93, 95-102 and 104-108 are rejected under 35 U.S.C. 103(a) as being unpatentable over Judson (US5737619) in view of Capek et al (US6094677) and Merriman et al (US5948061). Judson teaches the desire to display locally cached information (such as ads [col. 2 line 2, col. 7 lines 22-25]) to a user's web browser while the user waits for requested page content to be downloaded. Judson states that text or image content could be displayed during such wait periods. Judson teaches code in the requested web pages that request downloading of various, specified ads. Merriman et al teaches methods for providing webpages that include embedded coding in the pages that when executed by the browser cause ads (information objects) such as images, audio or video to be downloaded. The browser-executed requested webpages cause retrieval and display of the page content from the content server, as well as notify a management (ad) server to select an ad to be delivered to the user. The ad server selects the ad to be downloaded and does so by

Art Unit: 3622

decoupling the ad content/selection/location from the webpage content [col 3]. Clearly, the flexibility offered by allowing the server to choose the ad content and the particular ad files to send eliminates the need to hard-code specific advertising content/files in the referring page. In this manner, different users visiting the same pages can experience different (targeted) advertising. It would have been obvious to one of ordinary skill at the time of the invention to have included such uncoupled coding/ad tags with the pages of Judson so that targeted, user-specific ads could be selected for local caching and subsequent interstitial display. Regarding the "network server," the tcp/ip Internet request from the user's browser to the management server inherently is sent to the user's ISP as well as a number of servers located between the ISP and the destination server. Judson describes several processes/tests that determine/control browser function in order to implement the invention. Column 6 lines 13-16 describe that step 74 provides a test to determine whether a link associated with the object/ad is activated. Column 6 lines 18-28 describe a process where the client retrieves and displays the ad object in parallel with the downloaded of the requested content page. Step 84 includes a test/routine to determine whether the display is complete and allows the display of the requested content page. Column 7 lines 25-33 describe programming at the browser level to insert ads randomly, or even selective ads according to the user's history. Column 8 lines 30-43 describe the use of browser-executed Java applets (inherently include scripts and server url) to implement interactive/dynamic ads. Capek et al also describes methods to insert information (inserts can be ads [col. 8 lines 3+]) during delays in retrieving browser requested pages/information. Capek et al describes the

Art Unit: 3622

use of browser executed applets to accomplish several features such as detecting a client request for remote information [col 7 lines 18-23], determining the future delay duration [col 10 lines 9-12], and selecting relevant ads based on the users profile [col 5 lines 9-12]. It would have been obvious to one of ordinary skill at the time of the invention to have provided code-based applets with that of Judson in a manner as taught by Capek et al so that the tests and routines of Judson can be accomplished. Capek et al teaches the identification of each ad as well as the queuing of ads and playing the ads in a particular order [col 8 line 59 to col 9 line 5]. It would have been obvious to one of ordinary skill at the time of the invention to have downloaded the ads sequentially in the same order as they are to be played. The managers described by Capek et al can be taken to be "agents". It would have been obvious to one of ordinary skill at the time of the invention to have implemented the programming/managers as persistent within the user's browsing session so that other session-specific functions can be carried out as is well known, such as time of session tracking and customizing the ads for the specific user's session. Column 12 lines 39-42 describe a process of checking the configuration of the user's computer to determine whether a particular type of ad can be played back/displayed. It would have been obvious to one of ordinary skill at the time of the invention to have included a file describing the ad identity (as above) as well as the configuration options needed to successfully play the ad. Regarding claim 12, a new user session would inherently download and invoke the most recently stored applet, however it would have been obvious to one of ordinary skill at the time of

the invention to have checked for more recent versions so as to enable programming changes immediately.

### ***Conclusion***

This is an RCE of applicant's earlier Application No. 09/237718. All claims are drawn to the same invention claimed in the earlier application and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the earlier application. Applicant has merely moved the claim language of some dependant claims into the independent claims, however all claims were previously rejected using a single set of references and without any argument as to why the particular dependant claims should have been allowable, the examiner is merely repeating the rejection. Accordingly, **THIS ACTION IS MADE FINAL** even though it is a first action in this case. See MPEP § 706.07(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no, however, event will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jeffrey D. Carlson whose telephone number is 571-272-6716. The examiner can normally be reached on Mon-Fri 8:30-6p, (off on alternate Fridays).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Eric Stamber can be reached on (571)272-6724. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
